PROFILE

Product-focused Software Engineer with experience building end-to-end features across web and mobile applications. I specialize in creating high-quality user experiences while collaborating closely with product and engineering teams in fast-paced environments. I'm currently strengthening my frontend expertise while leveraging my full-stack background to deliver impactful, scalable solutions.

SKILLS

- Frontend:** ReactJS, JavaScript, TypeScript, HTML5, CSS3, SASS, Tailwind, Redux, JQuery, React-Router, React-Query, i18n.
- Backend:** NodeJS, NextJS PHP, .NET 5, Microservices, REST APIs.
- Mobile:** React Native, Android Studio.
- Databases & Cloud:** MongoDB, Firebase, MySQL, Azure, Railway.
- Testing:** Jest, React Testing Library, Postman.
- Tools & Workflow:** Figma, Git, GitHub, GitLab, Jira, Trello, Scrum, Agile Methods, Swagger, PostHog, Contentful.

BACHELOR OF SOFTWARE ENGINEERING (HONOURS)

National Technological University

BACHELOR OF ELECTROMECHANICAL EQUIPMENTS

Technical Education School

LANGUAGES

- Spanish: Native
- English: Advanced (C1)
- Italian: Advanced (C1)

EXPERIENCE

SOFTWARE ENGINEER — TRAZA (Sydney, Australia)

September 2025 - Present

- Collaborated with product and engineering stakeholders to define business logic and translate requirements into scalable technical solutions.
- Designed and implemented user interfaces with a focus on usability, performance, and maintainability.
- Managed Jira workflows, structuring and maintaining product-aligned epics.
- Built end-to-end features across the stack (frontend and server-side logic).
- Implemented an i18n (internationalization) library across the platform to support Spanish and Italian, owning end-to-end localization including all translations.
- Leveraged Firebase (DB, Authentication, and Cloud Functions) to power data, identity, and automated emails/notifications.

FRONTEND ENGINEER — Tot (Milan, Italy)

January 2024 - February 2025

- Designed and optimized user registration flows to improve onboarding experience.
- Developed and shipped new platform features including profiles, transactions, and user settings.
- Ensure interfaces are responsive across various devices and browsers.
- Work closely with backend developers, designers, and stakeholders to align business goals with user needs.
- Write clean, reusable, and maintainable code while participating in code reviews to ensure best practices and standards.

FULL STACK DEVELOPER — Folder IT (Santa Fe, Argentina)

March 2022 - December 2023

- Redesigned websites to enhance user satisfaction and aesthetics.
- Developed business logic/features for security tools and banking projects.
- Integrated payment platforms like Mercado Pago and Stripe.
- Migrated code from JavaScript to TypeScript.
- Fixed bugs, maintained websites, and supported new team members.

FULL STACK DEVELOPER — Serfe (Santa Fe, Argentina)

January 2021 - March 2022

- Improved UI, added features, and maintained the platform.
- Integrated APIs and social networks.
- Gathered client requirements and managed resources.
- Tested tasks and mentored team members.
